

CASE STUDY

Custom Sign Holders

Elite Display was approached by a client who wanted to display 11" x 7" paper price signs from shelves and end-caps, as well as from product displays. Their time-consuming procedure consisted of hanging signs with scotch tape. The signs would inevitably look sloppy, hang crooked and/or tear.

The Challenge

To develop a clean, durable, professional display.

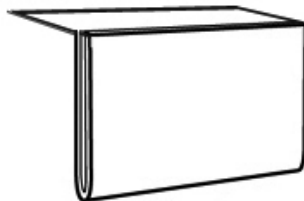

The Solution

Elite Display designed and manufactured custom clear PVC sign holders for the shelf application, and also created a similar design for wire bins.

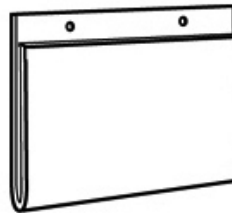

The Result

Our client is thrilled with the high-end look our sign holders provide. The heavy duty holders are long lasting and versatile. It's also very easy to change signs and move holders to different locations.
