

# Pallet Power signage system

Elite Display USA developed the Pallet Power signage system in response to the popularity of the “power aisle”, where retailers sell products directly from skids. The Pallet Power signage system is sold as a turn-key kit that includes everything you need to quickly drive sales. Kit includes the signboard, numerical flip pads, 4 message inserts and metal hardware. The 17”x13” signboard is 2 sided and has J-Channel rails to hold the flip pads and message insert. The heavy duty, black sign hanger base slides under pallet and is adjustable in height from 44”-70”. The versatile system allows quick and easy changes to messaging and price. A larger warehouse version of the Pallet Power signage system is also available for larger footprint stores. In addition, an optional custom vinyl pallet wrap is available to surround and conceal the pallet. The wrap allows messaging and branding, creating an overall clean look. The Pallet Power signage system is available exclusively from Elite Display USA.

Part Number/name	hanger height	sign board size	ground clearance	flip pads	messaging card	1-9 pcs.	10 or more
